EXPERIENCE.

- November 2023 - April 2024
Front-End Developer at Webistry.
 - Transformed XD and Figma designs into WordPress sites while prioritizing content-editing capabilities for clients
 - Worked closely with Team Lead to build modular WordPress components that would streamline the development process and create more efficient workflows
- October 2022 - September 2023
Solutions Architect at Safeline Group.
 - Designed a digital solution for time tracking and progress billing that tailored to the company's unique business requirements
 - Launched a time tracking app which improved time spent processing timesheets and administering payroll after performing extensive research and testing, and meeting with executives weekly to evaluate options
- August 2021 - September 2022
Technology Specialist at OPTrust.
 - Modernized reports in a legacy application called PARIS by translating the reports to a web-based application using Oracle APEX
 - Collaborated with the Director of Member Experience to update the company's annual pension statement templates
- March 2020 - August 2021
Front-End Developer at Be A Part Of.
 - Worked with designers and project managers to develop 12 ecommerce stores with close attention to detail and functionality, resulting in 5 five-star reviews
 - Translated Figma and PSD designs into responsive, high-quality pages while keeping track with project timelines and providing clients with regular updates
 - Assisted QA with testing, troubleshooted bugs and deployed fixes to ensure cross-platform usability
